

QUALITY AND DEDICATION
TO THE GLASS PROCESSING
INDUSTRY WORLDWIDE SINCE 1941

Who We Are.

- > Multinational Group that operated on global scale since 1941 driven by the founder's Family focus on long-term planning, ensured by continuity in management
- > The only chemical company worldwide fully dedicated to the glass industry
- > The only group that can propose any solutions for the mirrors, IG units production and deco glass adapting to any technology used in the market

Leader in chemicals for the glass processing industry.

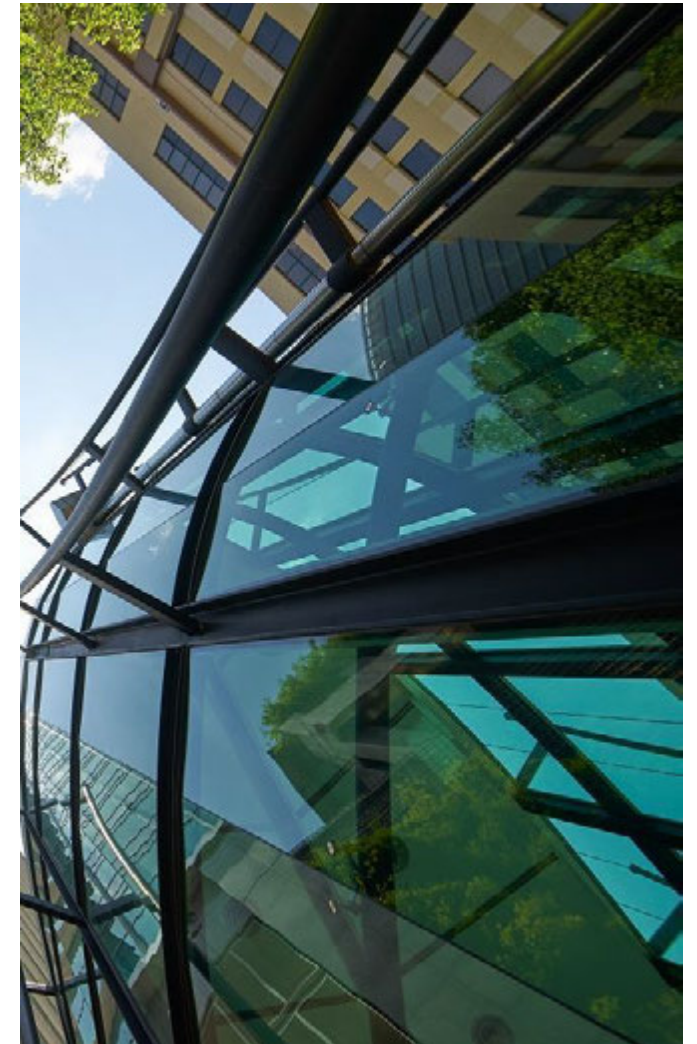

Our Vision:

- > To be a reference point for the glass industry representing an excellence for innovation and sustainability.

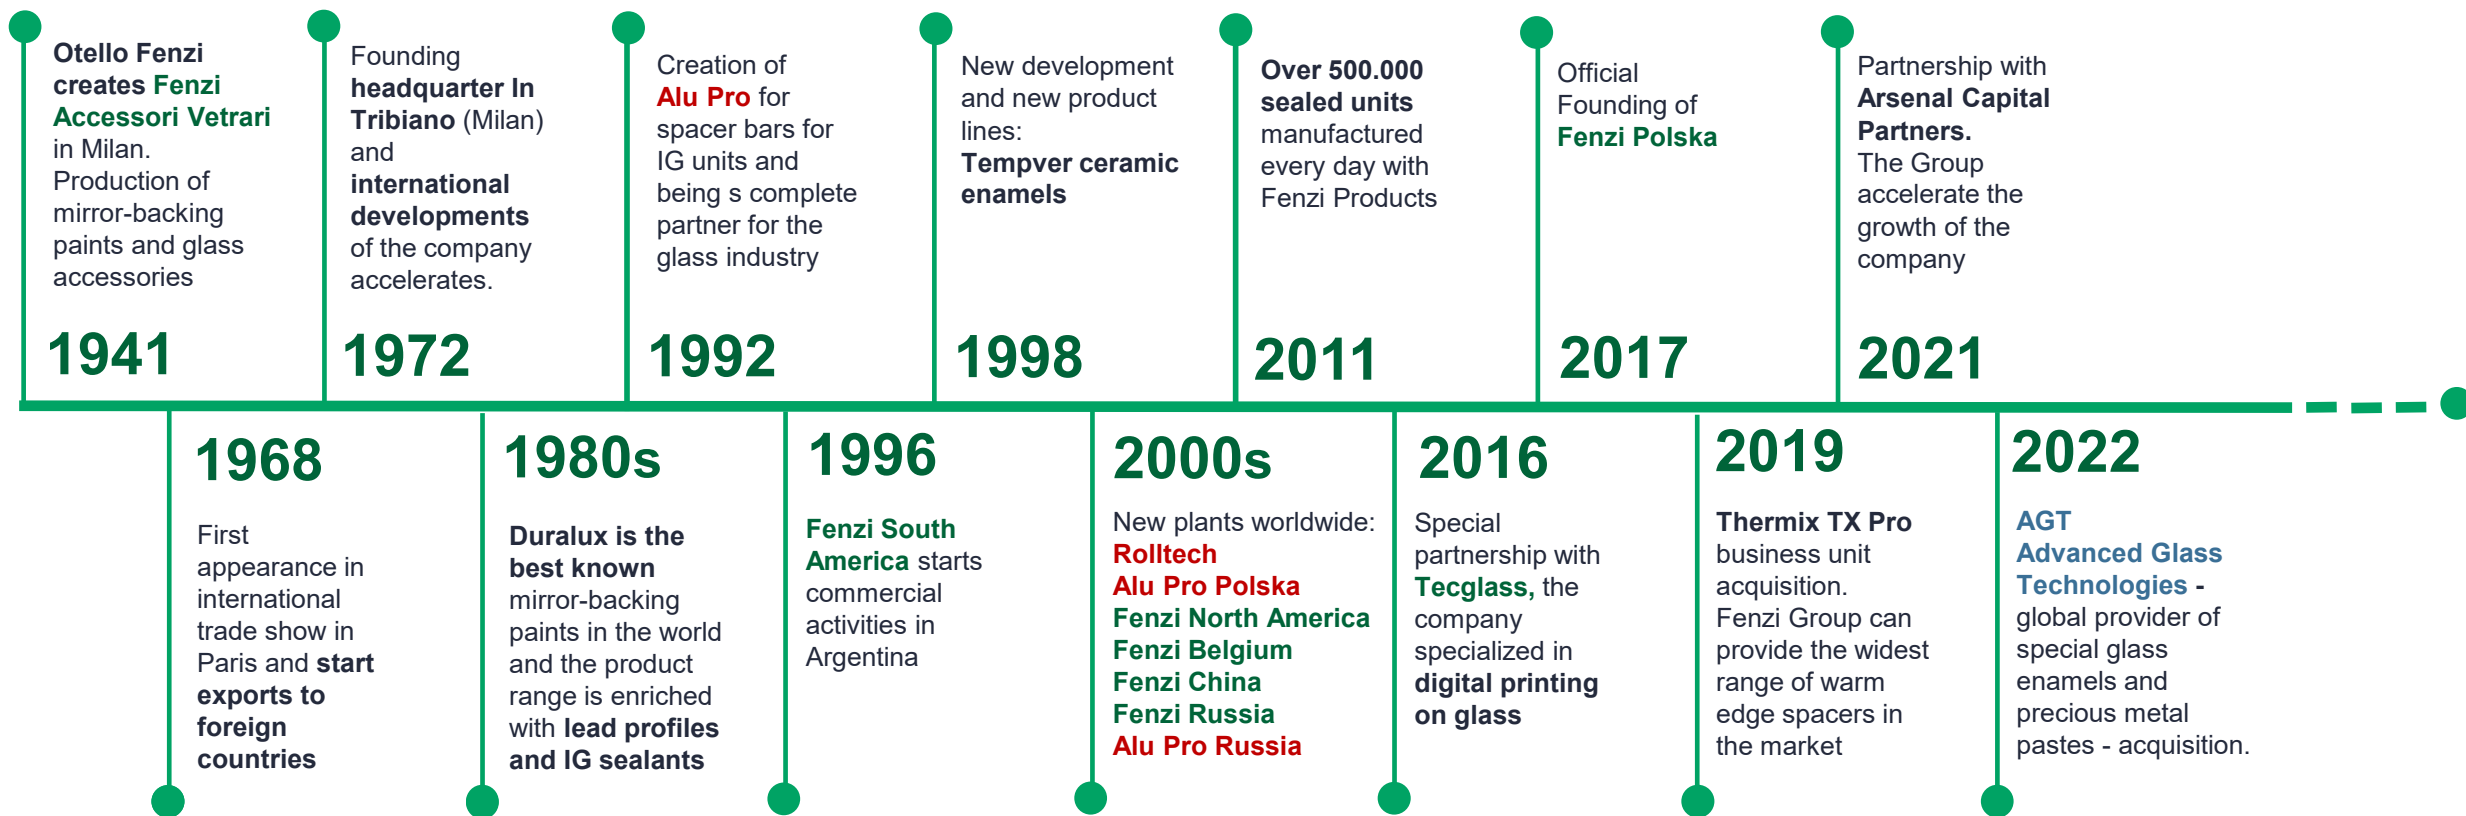

Our Mission:

- > To create and offer the most innovative solutions and the widest range of products used in the glass industry for the production of mirrors, IG units and deco glasses for many different application fields.
- > We focus on finding the perfect balance between innovation, quality, competitiveness and efficiency in order to improve with our products the comfort and well-being of people while respecting the lowest environmental impact.

Our History. More than 80 years dedicated to the glass industry.

The FENZI logo is displayed in a green rectangular box with the word "FENZI" in white, bold, sans-serif capital letters.

BUSINESS UNITS

The Group focuses on 5 major areas:

- Components for Insulating Glass
- Mirror-backing paints and Silvering solutions
- Ceramic and organic decorative paints
- AGT Advanced Glass Technologies
- Digital Printers [Special partnership with Tecglass]

Leader in chemicals for the glass processing industry.

Business Units.

Our key markets

Nautical

Automotive & Railways

Industrial Refrigeration

Antifire Windows

Commercial & Residential Constructions

Architecture

Interior Design & Furniture

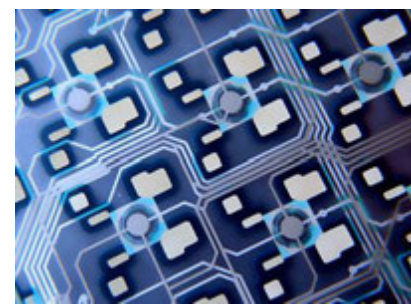

Hollow Glass

Home Appliance

Electronics & Passive Components

1. Components for insulating glass (IG)

- > Polysulphide, butyl, hot-melt and polyurethane sealants; aluminum spacers, warm edge spacers made of steel, stainless steel, and combined steel and special plastic materials.
- > All the components needed to produce high performance IG units, available any time and in any part of the world.

Leader in chemicals for the glass processing industry.

Sealants for IG Units.

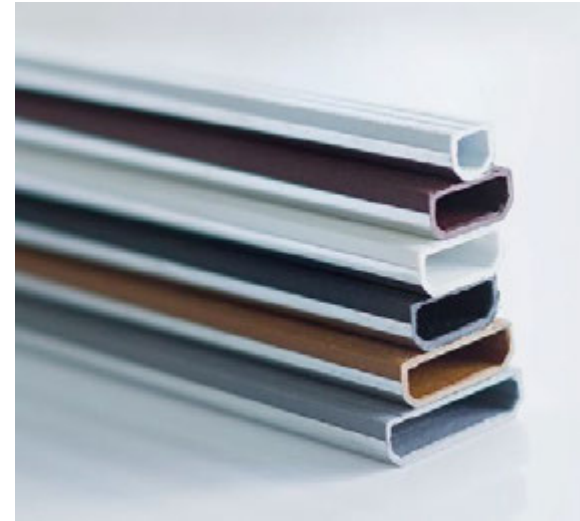

- > **Primary Sealant**
 - Butylver
- > **Secondary Sealants**
 - PS -> Thiover
 - PU -> Poliver/Purseal
 - Hotmelt -> Hotver
- > **Molecular Sieves**
 - Molver
- > **Advanced Warm Edge System**
 - Butylver TPS [ThermoPlasticSpacer]
 - Butylver TPS AF [Fire Resistant]

Spacers for IG units.

> Traditional Spacer

- Aluminium
- Painted
- Anodized
- Galvanized steel -> **Ferrotech**

> Warm Edge Technologies

- Stainless Steel -> **Chromatech**, **Chromatech plus**
- Hybrid -> **Chromatech Ultra F** and **S – Thermix**
- Special Plastic -> **Multitech**

2. Mirror-backing paints And Silvering Solutions

> A unique set of products to cover the entire mirror production cycle, in several versions, from the most traditional to sophisticated copper-free and zero-lead technologies.

> Fenzi produces also high chemical resistance paints for solar mirrors.

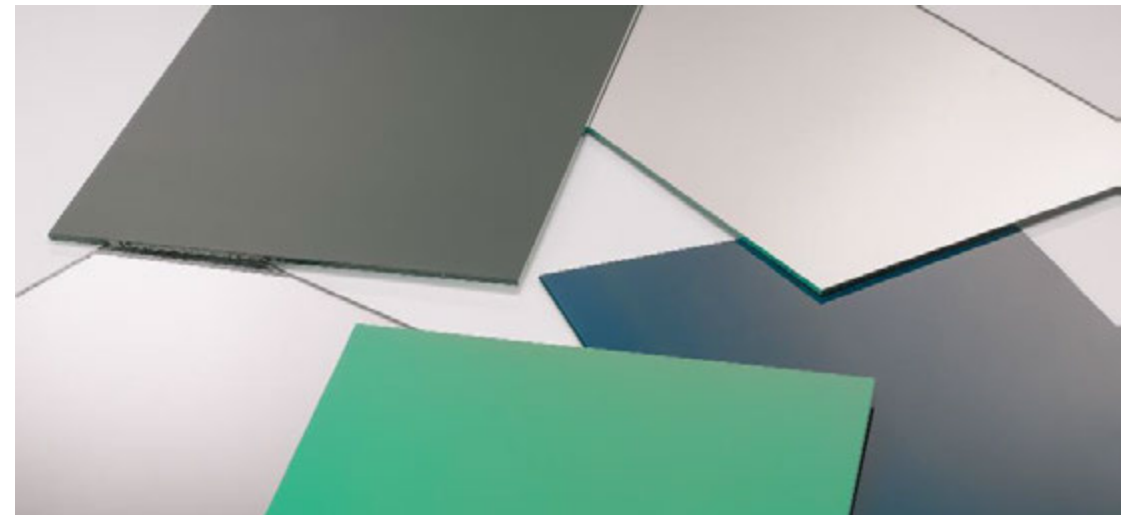

Leader in chemicals for the glass processing industry.

Paints and chemicals.

- > Solvent based paints for copper and copper-free mirrors
 - Duralux
 - Silverlux
- > Ultra durable 2-component mirror coating
 - Duralux 2020
- > Water based Mirror Backing Paints
 - Duralux Water Based
- > Solar Mirror Backing Paints for copper and copper-free solar mirrors
 - Duralux Solar Coatings
- > All type of Silvering Solutions for copper and copper-free mirrors
 - Luxver

Available in the low-lead
and lead-free versions.

3. Ceramic and organic decorative paints

> Tempver range of glass enamels for screen-printing, enameling and satin-finishing glass.

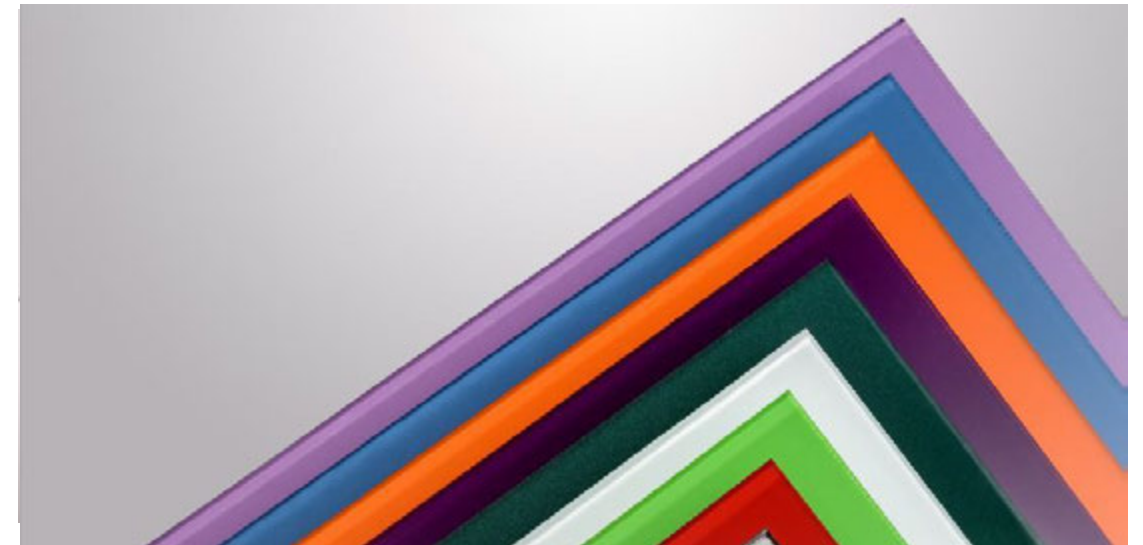

> Decover range of organic paints for cold application, in two different types: organic solvent paints and water-based paints.

Decorative enamels and paints.

- > **Ceramic Glass enamels**
 - Tempver Range 39 [Architecture]
 - Tempver Range 3401 [Interior Design]
 - Tempver New Generation M [Appliance]
 - Tempver Automotive
 - Tempver HG [Hollow Glass]

- > **Decorative Paints for cold application**
 - Decover [solvent-based products]:
Glassolux - Sandolux - Pearlux
 - Aquaglass [water-based product]
 - AquaglassXpack [Hollow Glass]

4. AGT Advanced Glass Technologies

> A complete range of automotive black obscuration enamels, Conductive silver pastes, Functional coatings, Precious metal inks, Corrosion resistant components, Enamels.

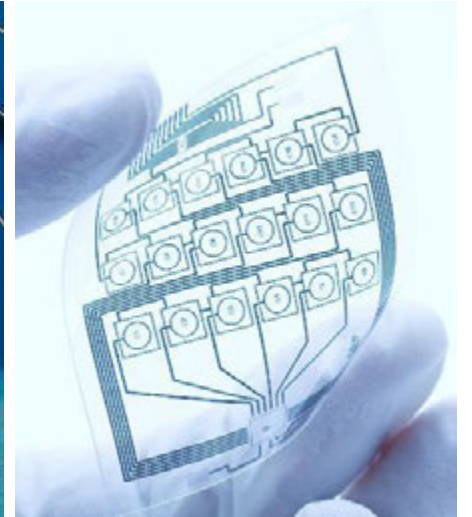

> Developed by **AGT Advanced Glass Technologies** – the global provider of cutting edge solutions, now part of the Fenzi Group.

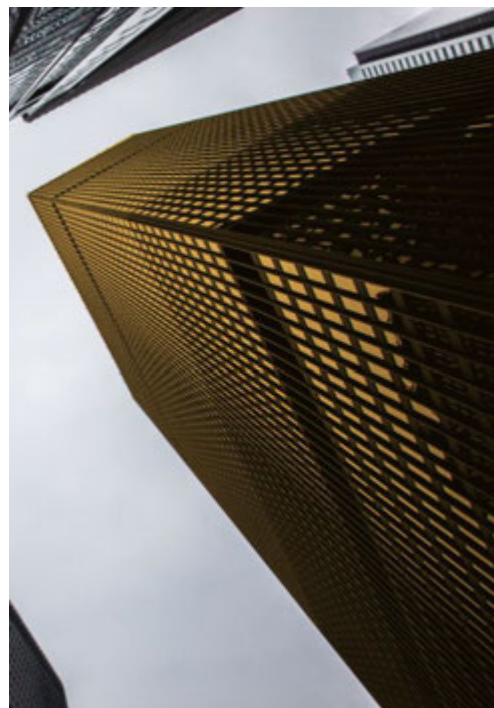

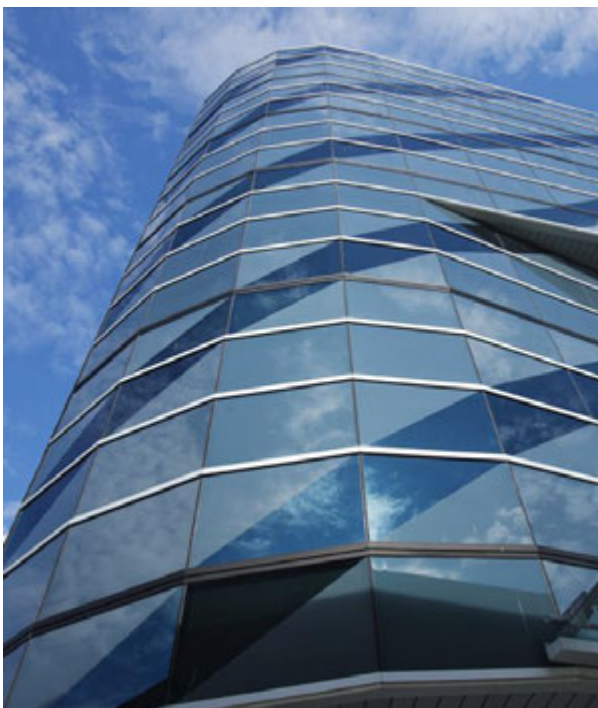

Leader in chemicals for the glass processing industry.

Special glass enamels and precious metal pastes

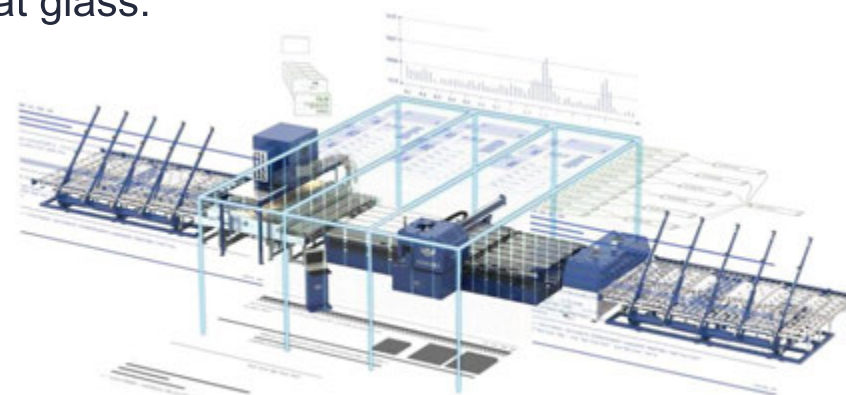

- > Laminating enamels, tempering enamels, silver paste for automotive
- > Appliance & architectural enamels
- > Glass enamels for bottles
- > Technical glass solutions (Sealing glasses, Functional coatings, etc.)
- > Precious metal inks for brushing, decal, direct screening, machine banding, thermoplastic printing, tiles
- > Specialties for electronic industry (silver powders & flakes, printed electronic inks, silver salts, etc.)

5. Inkjet printers and ceramic inks

> Thanks to a special partnership with **Tecglass**, worldwide key player in printing technologies, the Group offers a complete range of machinery and ceramic inks for digital printing on flat glass.

Leader in chemicals for the glass processing industry.

Digital printing technologies.

- > **Digital printers**
 - Turnkey Solutions for any kind of application in architecture, automotive, commercial refrigeration, home appliance.
- > **Line components & Tools**
 - washing machine, clean room, infrared dryer, scanner
 - All equipment manufactured In-House.
 - Design software and tools

Digital printing ceramic inks.

> Inks

- **Jetver range:** ceramic inks compatible with every modern technology in all the application sectors.

The FENZI logo is displayed in a green rectangular box with the word "FENZI" in white, bold, sans-serif capital letters.

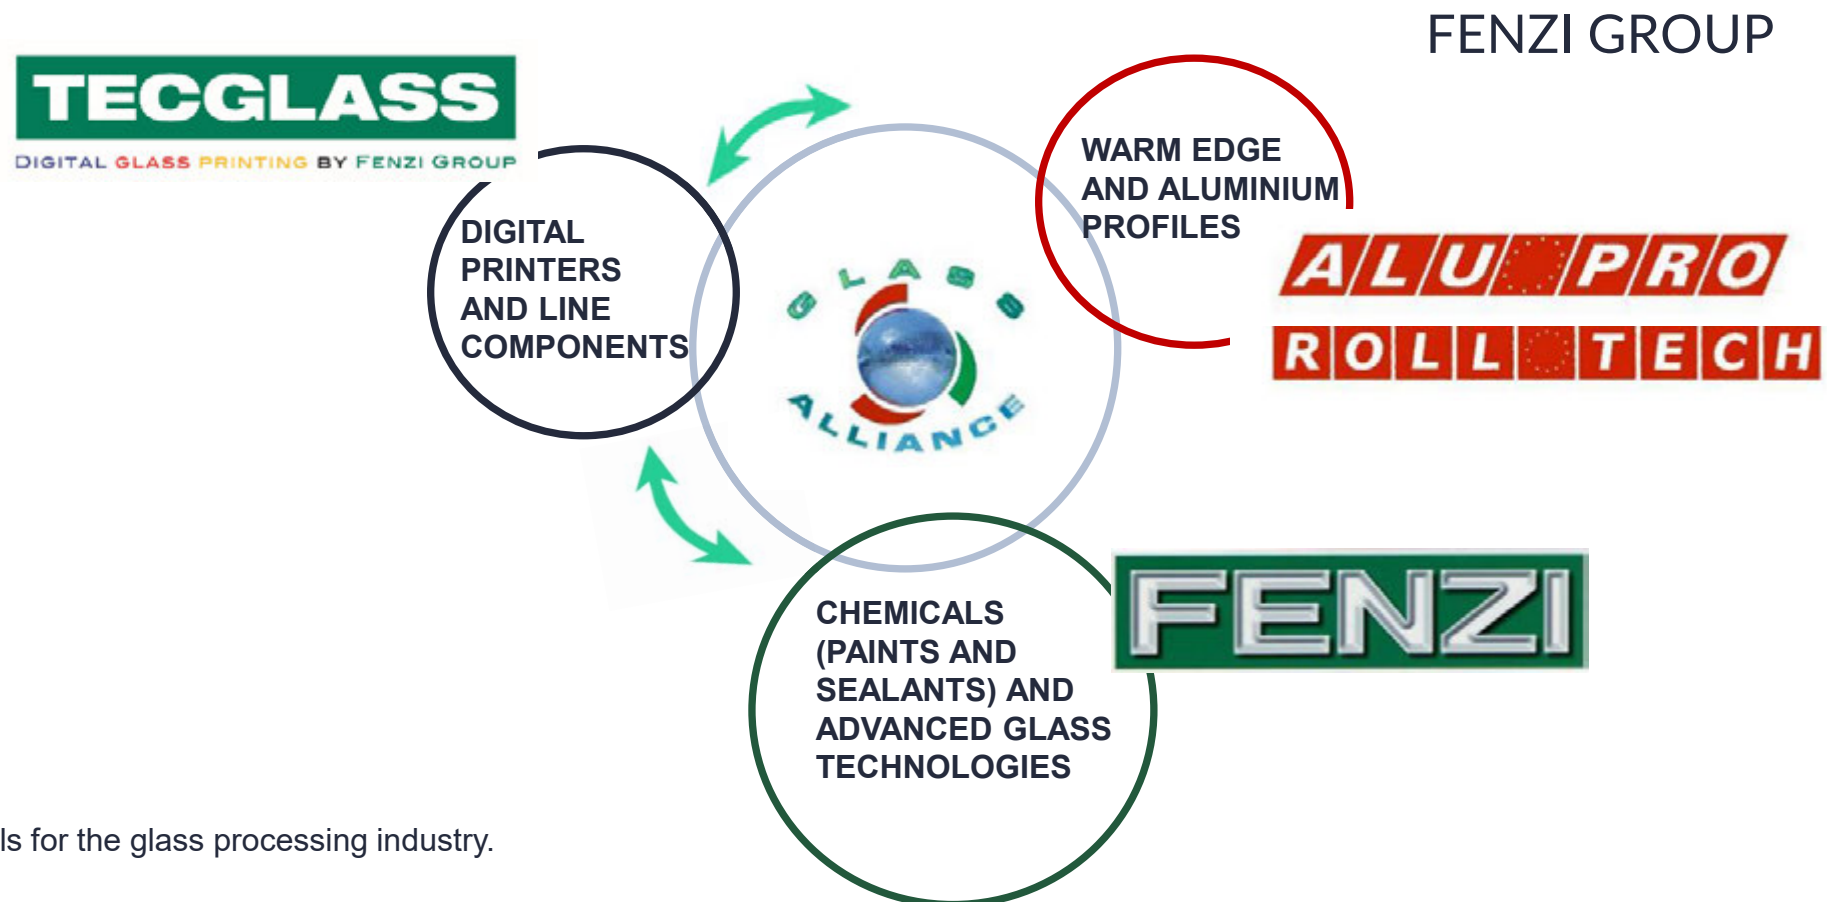

A WORLDWIDE PRESENCE

With various production plants that also function as distribution centers, as well as a tightknit network of agents and distributors, coverage is almost total.

Leader in chemicals for the glass processing industry.

A privately-owned group, entirely dedicated to its customers

Creating well-being while protecting the environment.

> Fenzi aims at minimizing the environmental impact of its products, always selecting the most eco-friendly alternatives to achieve sustainable development objectives.

Leader in chemicals for the glass processing industry.

The FENZI logo is displayed in a green rectangular box with a thin white border. The word "FENZI" is written in a bold, white, sans-serif font with a slight shadow effect.

FENZI

THE FENZI GROUP BY THE NUMBERS

Positive Results since its creation.

Leader in chemicals for the glass processing industry.

The Fenzi Group by numbers.

Positive results since its creation.

Leader in chemicals for the glass processing industry.

Over 1100
EMPLOYEES

500 mln €
SALES

#1
IN THE WORLD FOR

- > mirror backing paints
- > polysulphide IG sealants
- > industrial decorative paints for architectural glass
- > precious metal pastes
- > digital printing technologies

What our customers like about us

- > Flexibility
- > Outstanding Technical Customer Support
- > Talent for a cooperative business
- > Products reliability
- > A long experience In specialty chemicals and technical glass solutions.

Leader in chemicals for the glass processing industry.

THANK YOU
FOR YOUR
ATTENTION
